FORKLIFTS

CONVERSION KITS

Attach your **Donkey Forklift** to any straight truck or trailer with ease. Our **conversion kit** makes it simple to fit a Donkey unit onto competitor mounts, ensuring seamless integration and versatility.

HOOK STYLE:

This bolt-on system allows for hook style mount conversions to be completed either at the **factory or in the field**. It includes bolt on hooks and safety chains.

CABLE MOUNT:

We can convert Donkey Forklifts to the **cable** mount. Our solution includes bolt-on structural weldments and mounting chains. It can be converted in the **field or at the factory**

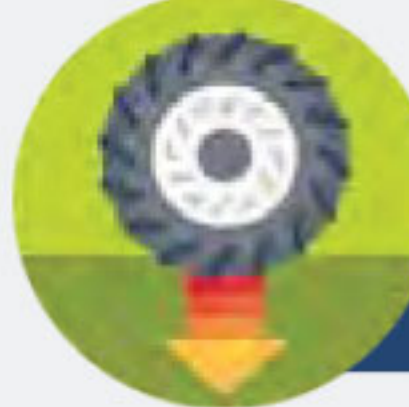

DONKEY

FORKLIFTS

The lightest, fastest, most versatile in America

Lowest ground pressure (LGP) of any forklift on the market

Longest standard reach in the industry

Centralized weight distribution

BURRO

Better than an all-terrain pallet jack, our Burro Truck Carried Forklift is your best solution for smaller jobs. At only 1,800 lbs, the Burro lifts 3,000 lbs to 65 inches.

4K SERIES

This lightweight, affordable Donkey unit lifts 4,000 lbs and features a Tier 4 Kubota engine, 6-speed GM transmission, side shift, strobe light, smart backup alarm, and corrosion resistance.

LOW PROFILE SERIES

This specialized low clearance unit adds value where other forklifts can't. The Low Profile Series has standard features that include side shift, strobe light, smart backup alarm, and corrosion resistance.

5K SERIES

This economical Donkey unit, powered by a Tier 4 Kubota engine, can lift up to 5,000 lbs. It offers multiple mast height and reach options, various tire choices, a 6-speed GM transmission, side shift capability, a strobe light, a smart backup alarm, and corrosion-resistant components.

5.5K SERIES

Lifting 5,500 lbs. up to 120 inches, The 5.5K Series has the power and durability for the heaviest loads. Its strong, durable construction and large weight-bearing capacity make the 5.5K Series your heavy industry solution.

THE JACK

The Jack offers 5,500 lbs of lift without stabilizer feet, boasting best-in-class stability and center of gravity with a fixed mast design. Compatible with all mounts (hook, cable, and pocket), it enhances delivery production with the fastest hydrostatic unit in the industry.
